

CLOSE ALL WINDOWS

Close All Windows is a script to close all open documents / windows in the current Adobe application, without closing the application itself.

- Installation -

To install the script, copy the file **Close All Windows.jsx** into the script directory of the Adobe Application you wish to use it in.

Windows:

Illustrator:

No installation required. Load the script from within the application

Photoshop:

C:\Program Files\Adobe\Adobe Photoshop <version>\Presets\Scripts

Mac OS:

Illustrator:

No installation required. Load the script from within the application

Photoshop:

Applications/Adobe Photoshop <version>/Presets/Scripts

- Usage -

To run the script, go to: **File → Scripts → Close All Windows**

* Simply run the script and all the documents open within the application will close.

* This script does NOT save your files. It only closes the windows. Be sure to save any unfinished work before running the script

****Note:** If you install the script when the required Adobe application is running, you need to restart the application to use the script.
